

U.S. Healthcare Market Context for Medtech Diligence

Public-source market packet for Solaris Endovascular demo ingestion

Company: Solaris Endovascular, Inc.

Prepared: 2026-05-27

Status: Public-source summary with synthetic diligence implications

Demo Use: Data-room ingestion and citation testing

Purpose

- This packet gives investors market context for a U.S. life-sciences and medical technology diligence process. It is intended to support source-grounded answers about market size, spending pressure, and reimbursement scrutiny.
- Solaris Endovascular company-specific statements remain synthetic. CMS figures in this packet are public context only.

Key Public Data Points

- CMS reported that U.S. national health expenditures grew 7.2% in 2024 and reached \$5.3 trillion.
- CMS reported 2024 spending of \$15,474 per person.
- CMS reported that health spending accounted for 18.0% of U.S. gross domestic product in 2024.
- CMS projected average national health expenditure growth of 5.8% over 2024-2033, outpacing projected average GDP growth of 4.3%.

Diligence Implications

- Large health spending supports a significant addressable system for innovative devices, but it also increases payer and provider scrutiny.
- Investors should ask whether Solaris can demonstrate procedural value, training efficiency, reimbursement fit, and hospital budget alignment.
- The diligence agent should cite this packet only for public market context, not for Solaris-specific revenue claims.
