

FedRAMP Alignment Gap Assessment

Future-readiness assessment for academic medical center and public-sector buyers

Company: Solaris Endovascular, Inc.

Prepared: 2026-05-27

Status: Synthetic company data for demo ingestion

Demo Use: Data-room ingestion and citation testing

Assessment Summary

- Solaris is not FedRAMP authorized.
- Management maps selected controls to FedRAMP Moderate as a future-readiness exercise.
- The current alignment effort is intended for buyer diligence and roadmap planning, not for federal authorization claims.

Aligned Areas

- MFA for workforce cloud accounts.
- Role-based access controls for regulated records.
- Encrypted backups.
- Incident response tabletop planning.
- Vendor security reviews for critical vendors.

Gaps

- No formal FedRAMP system security plan.
- No third-party assessment organization engagement.
- Incomplete continuous monitoring package.
- Incomplete configuration baseline evidence.

Investor Interpretation

- FedRAMP alignment should be treated as roadmap evidence, not a compliance certification.
- Buyers requiring federal authorization would require a materially larger compliance investment.

Demo data room packet. Company-specific Solaris information is synthetic unless explicitly identified as public-source context.
