

Patent Landscape and FTO Summary

Synthetic IP diligence packet for Solaris Endovascular

Company: Solaris Endovascular, Inc.	Prepared: 2026-05-27
Status: Synthetic company data for demo ingestion	Demo Use: Data-room ingestion and citation testing

Patent Families

- Family 1: variable-stiffness distal catheter architecture; U.S. non-provisional filed 2023-04-14; PCT filed 2024-04-12.
- Family 2: low-friction hydrophilic coating process; U.S. provisional filed 2024-09-03.
- Family 3: lot-specific procedural traceability workflow; U.S. provisional filed 2025-12-18.

Trade Secrets

- Braided-shaft thermal set process.
- Distal marker placement process.
- Tortuous-path simulated-use fixture design.
- Supplier acceptance criteria for micro-braid lots.

FTO View

- Outside counsel's initial landscape review did not identify a blocking patent.
- Counsel recommended a refreshed review before commercial launch because neurovascular delivery systems are an active patent area.
- Investors should request the counsel memo under NDA before signing final investment documents.

Demo data room packet. Company-specific Solaris information is synthetic unless explicitly identified as public-source context.
